MERN Stack Assignment

As part of the hiring process, PSQUARE COMPANY is looking for a MERN (MongoDB, Express.js, React, Node.js) stack project. The creation of an effective HRMS dashboard is the goal of this project. You can follow the design here **FIGMA**.
Features we want:

1. Authentication and Authorization:
  • Implement user login using JWT tokens, ensuring the HR session is valid for
  • only 2 hours.
  • Ensure proper form validation for login and registration fields.
  • Auto-logout after session expiration.

2. Candidate Management:
  • HR can Create candidate profiles.
  • Able to download a candidate's resume as a PDF.
  • Once candidate selected, move them to the employee management with their details intact.
  • Implement Filters/Search as per Figma designs.

3. Employee Management:
  • HR can manage employee details **"Edit, Delete"** and assign them roles.
  • Implement Filters/Search as per Figma designs.

4. Attendance Management:
  • Only current employees shows in Attendance.
  • Implement Filters/Search as per Figma designs.

5. Leaves Management:
  • Only **"Present"** employees can take leaves.
  • HR can create a leave and update its status
  • Display only **"Approved"** leaves in the leave calendar Section and able to see approved leaves on different dates.
  • Docs should be downloadable.
  • Implement Filters/Search as per Figma designs.

6. Design Guidelines:
  • The layout should be Responsive.
  • Follow the design's colour guidelines for various scenarios.

7. *Submission:*
   Host this project on free hosting like vercel, render and send it along with the zip file and explanation video of the project.

   NOTE: You need to use vanilla CSS for this project only.

8. *What we will judge:*
  • State Management
  • Responsiveness
  • Error Handling
  • HTML/CSS structure
  • Routing
  • Reusability
  • Folder Structure
